

CIT-C

STABILIZED VITAMIN C SUPPLEMENT

COMPOSITION :

Each kg contains :

Vitamin C 900 g

Excipients q.s.

DESCRIPTION :

Vitamin C is as an antioxidant which is needed for the proper operation of many physiological functions. It is essential for the formation of collagen and intercellular material, and therefore necessary for the proper development of cartilage, bone, teeth and for the healing of wounds. It also acts to provide support during stressful situations (caused, for instance, by vaccination, diseases, transport, high humidity, high temperatures or extreme temperature changes). Ascorbic acid is a strong aqueous antioxidant and acts as a cofactor for many enzymes. It is one of the strongest reductants and radical scavengers, acting as a primary defense against aqueous radicals in the blood.

BENEFITS :

Complements vitamin C deficiency.

An antioxidant protecting cells against damage caused by free radicals.

Supportive during stress (e.g. vaccination, heat or cold stress).

Simple administration through drinking water.

DOSAGE :

For oral administration through drinking water.

Camels and Cattle : 30 g per day

Sheep and Goats : 3 g per day

Poultry : 250 g per 1000 litres of drinking water.

WITHDRAWAL PERIOD :

Nil

PACK SIZE :

Sachet of 500 g and Jar of 4 kg & 10 kg.

Manufactured in India by :

IPPL
Intracin
