

CLOSATIN LIQUID

CLOSANTEL AND IVERMECTIN SOLUTION

COMPOSITION :

Each ml contains :

Ivermectin	B.P.	2 mg
Closantel	E.P.	50 mg
Aqueous base		q.s.

INDICATIONS :

Closantel and Ivermectin oral liquid is indicated for the treatment and control of mixed infestations of both internal (nematodes and flukes) and external parasites in Cattle, Buffaloes, Sheep and Goats.

Gastrointestinal roundworms :

Effective against various adult and larval stages of species such as *Haemonchus* spp., *Ostertagia* spp., *Trichostrongylus* spp., *Cooperia* spp., *Nematodirus* spp., *Oesophagostomum* spp., *Bunostomum* spp., and *Chabertia* spp.

Lungworms : Treats *Dictyocaulus viviparus* (adult and fourth stage larvae).

Trematodes (Flukes):

Closantel is particularly effective against adult and late immature liver flukes, including *Fasciola hepatica* and *Fasciola gigantica*.

Eyeworms : Effective against *Thelazia* spp. in Cattle and Sheep.

External parasites :

Treats arthropod infestations including :

Lice (*Linognathus vituli*, *Haematopinus eurysternus*, *Damalinia bovis*).

Mites (causes of mange and scabies, such as *Psoroptes ovis*,

Sarcoptes scabiei and *Chorioptes bovis*).

Nasal Bots (larval stages of *Oestrus ovis*).

DOSAGE AND ADMINISTRATION :

Cattle, Buffaloes, Sheep and Goats : 3 ml / 10 kg body weight.

Direct oral administration :

The most common method involves using a drenching gun or an oral dosing syringe to place the specified amount of liquid into the back of the animal's mouth, over the tongue. This technique is intended to help prevent the animal from spitting out the medication and aims to ensure it is swallowed correctly.

Mixing with water/feed (Less common) :

While some formulations might be suitable for mixing with a small quantity of water or feed, direct administration is generally favored for better absorption and to help ensure the entire dose is consumed.

WITHDRAWAL PERIOD :

Meat : 28 days, Milk : 7 days

PACK SIZE : 1 Litre

Manufactured in India by :
