

DCP-INTRA

DI CALCIUM PHOSPHATE POWDER FOR ORAL ADMINISTRATION

COMPOSITION :

Each 500 gram contains :

Calcium 24 %

Phosphorous 18 %

Vitamin D3 - 35000 IU

INDICATIONS :

In Poultry DCP is indicated for :

The control of incidences of cannibalism, eating of eggs, weak shells and no shell formation. The increase in egg production.

DCP is a livestock dietary supplement used to combat Calcium and/or Phosphorous related deficiencies in all livestock. DCP-INTRA is a high-quality granulated DCP with the correct ratio of Phosphorous and Calcium that ensures high biological potency making it more bioavailable for Poultry, Pigs and dairy Cattle. DCP-INTRA also contains vitamin D3 which helps animals absorb Calcium and Phosphorous from food and helps maintain a balance of these minerals in the body.

DOSAGE AND ADMINISTRATION :

Poultry :

Mix thoroughly 10 tablespoons (150 g) of DCP with 70 kg of feed or 1 tablespoonful in 7 kg of feed. Give DCP for at least 14 days or until the symptoms of deficiency disappear.

Other animals :

Mix thoroughly 5 tablespoonfuls (75g) of DCP with 70 kg of feed or 1 tablespoonful in 15 kg of feed. Give DCP for at least one month, or until the symptoms of deficiency disappear.
