

ABXOL

Ambroxol Hydrochloride Injection

COMPOSITION :

Each ml contains :

Ambroxol Hydrochloride B.P	6 mg
Water For Injection B.P	q.s.

INDICATIONS :

ABXOL is indicated to aid in the treatment of catarrhal inflammation of bronchi and the upper respiratory tract in Horses and Dogs. specific indications include :

Chest Infections : acute and chronic, bronchopneumonia, catarrhal rhinitis, strangles, post-viral cough.

Uterine infections : pyometron, mucometron.

ACTION :

ABXOL is a mucolytic expectorant. Ambroxol is an active metabolite of bromhexine and acts to reduce the viscosity of tenacious mucus secretions by fragmentation of long mucopolysaccharide chains, resulting in a productive cough which aids expectoration of liquefied mucoid respiratory secretions and assist in clearing and maintaining patent bronchioles and alveoli hence reducing dyspnoea. ABXOL enhances the concentrations of chemotherapeutic agents in bronchial secretions to result in a more rapid recovery.

DOSAGE AND ADMINISTRATION :

Horses : 0.3 mg/kg (5ml/100kg) bodyweight twice daily.

Dogs : 0.6 mg/kg (1 ml/kg) bodyweight twice daily.

Administer ABXOL by Intravenous Injection.

WITHDRAWAL PERIOD :

[Horses] : 28 Days

STORAGE :

Store at a temperature not exceeding 30°C.

Protect from light.
