### INDICATIONS :

O-VIT WS is a highly effective combination of a broad-spectrum antibiotics (Oxytetracycline) and vitamins. The product stimulates egg production, increases growth, improves feed conversion and is used as a vitamin supplement during periods of diseases and stress. It is active against gastrointestinal, respiratory and urinary infections caused by oxytetracycline sensitive micro-organisms, like Bordetella, Campylobacter, Chlamydia, E. coli, Haemophilus, Mycoplasma, Pasteurella, Rickettsia, Salmonella, Staphylococcus and Streptococcus spp. in calves, goats, sheep, poultry and swine.

### DIRECTION FOR USE :

**Day old periods :** Add 5 g to each 5 litres of drinking water for one to two weeks.

**Stress Periods :** To maintain appetite at vaccinations, during extremes of temperature and other upsets, use at the rate of 5 g to each 10 litres of drinking water. Start this treatment two days before vaccinations or planned feed change and continue for seven days.

At times of sickness: Add 5 g to each 5 litres of drinking water and continue treatment for seven days.

**To prevent Vaccination Stress:** Give chicks solution containing 5 g to each 10 litres of drinking water for two days before and seven days after all vaccinations.

**Laying Hens :** Add 5 g to each 10 litres of drinking water for four weeks followed by 5 g in 50 litres of drinking water daily.

### STORAGE :

Store at a temperature not exceeding 25°C.

Protect from light.
